- + Reduces Days in A/R through advanced built-in error detection.
- + Turnkey and ASP models available
- + Simple one-time setup
- + Part A and Part B billing included

With more than 28 years experience developing Medical Billing software systems, Healthpac Computer Systems, Inc. has developed its Laboratory Billing Software with the following features:

- + We have a powerful HL7 bi-directional interface that seamlessly sends and receives billing information between your LIS and our H+Plus Professional Laboratory Billing Software.
- + Transparent interface to Laboratory Information System developed in conjunction with a large LIS vendor. Both systems working together help keep all records updated and correct.
- + Logical Design for ease of use and minimal training requirements.
- + Based on "Rules of Engagement" tables that are easily changed by the client when required in special situations.
- + Extensive software scrubbers and error checking processes work to correct claims data before transmission thereby reducing rejections, and lowering outstanding days in A/R.
- + Simple one-time setup.
- + Complete user control of charges progressing to the billing system. Charges can be reviewed, updated or corrected before claims processing.

**Chosen by the State of Texas and the State of Florida to automate the billing for their state wide lab facilities!**
