Healthpac Computer Systems, Inc. has developed medical billing software specifically designed for Radiology Billing. We assure an increase in collections when you install our software solution for Radiology Billing.

With over 28 years of experience in working with Radiology billers and facilities nationwide, the H+Plus Professional solution is designed to specifically handle your needs and includes the following features:

- + Hospital Download Interfaces
- + Interfaces to CodeRyte and other coding software Available
- + Interface with RIS and PACS
- + Extensive software scrubbers and error checking processes work to correct claims data before transmission thereby reducing rejections, and lowering outstanding days in A/R.
- + Simple one-time setup
- + Complete user control of charges progressing to the billing system. Charges can be reviewed, updated or corrected before claims processing.

Healthpac has been a pioneer in the healthcare billing community since 1981. Our breakthrough billing solutions employ strategic managing to the model and closed loop processes. We automate the management side of a company and not just the clerical side. Our execution of a paperless work queue environment frees users to produce two to three times more than they would normally.
