

SLEEP CENTER BILLING

Healthpac Computer Systems, Inc. has developed medical billing software specifically designed for Sleep Center Billing. We assure an increase in collections when you install our software solution.

Healthpac has been a pioneer in the healthcare billing community since 1981. Our breakthrough billing solutions employ strategic managing to the model and closed loop processes. We help to automate both the management and clerical sides of your organization. Our newly redesigned paperless work queues empower users, allowing them to perform at a level two to three times higher than other systems. With over 28 years of experience in working with providers, facilities, and medical billing personnel nationwide, we designed the H+Plus Professional solution to specifically handle your needs including the features listed below.

H+Plus Professional Key Features and Benefits:

- + Advanced web-based scheduling system offering centralized management of single and multi-site labs, available resource views of beds and technicians, seamless sleep study workflow, strategic rescheduling of missed appointments, and much more...
 - + A powerful bi-directional HL7 interface that seamlessly sends and receives billing information between Scheduling, Sleep Diagnostics and our H+Plus Professional Billing System
 - + Advanced built-in error detection works to reduce the number of rejected claims and helps to keep outstanding Accounts Receivable days at a low level.
 - + Complete user control of charges progressing to the billing system. Charges can be reviewed, updated or corrected before claims processing.
 - + Based on "Rules of Billing" tables that are easily changed by the user when required for special situations.
- + Customizable web-based scheduling system
 - + Paperless Work Queues
 - + Dashboard Analytics
 - + Integrated Multi-Bed Scheduling
 - + Sleep Study Workflow
 - + Scanned Document Imaging
 - + Electronic Claims Submission
 - + Electronic Remittance Posting
 - + Epworth Sleepiness Study
 - + Voice Activated Dictation
 - + Automated Report Faxing
 - + Logical Design for ease of use and minimal training
 - + Automated PHI Auditing Systems
 - + HIPAA Compliant
 - + Simple one-time setup
 - + Turnkey and ASP models available
 - + Hospital Download Interfaces
 - + Medical Necessity Testing
